

We are about to be with our big Kenyan family once again, leaving in just a few days with Air Canada to Montreal, one stop in Germany and on to Nairobi.

For those who prayed for Tammy, Nancy's daughter who experienced 4 trips to emergency recently, we are happy to report the internal medicine specialist's diagnosis: toxicity from a thyroid medication, and he is also sending her for tests to rule out other possibilities which he expects to all be normal. She is still nauseous and we ask continued prayer for her. Edwin's daughter, Julie, also needs continued prayer as she battles effects in her body of long term lyme's disease, Julie is home now and continues the detoxification process towards completing her treatment.

Good thing we can be in contact with our daughters by phone from Kenya at 5 cents a minute!

Eleven years have dashed by since Mercy and Caring Children's Homes became a registered Canadian Charity. We began the care of African children back in 2002. Please come and celebrate with us what God has done. We plan to return with new stories and pictures and want to share them with you. Dates to follow. We could use some help if you like organizing events.

Thank you for your interest, your prayer and support through 2016. Please pray for wisdom in relationships and decisions and safety as we travel.

Our return date is before the end of February, 2017.
HAPPY NEW YEAR. May God's favor be on each of you.

Edwin and Nancy Cahill
Mission Directors,
Mercy and Caring Children's Homes

This trip. we look forward to being in Kenya for 3 weeks with Trevor and Candice, aa young couple on our Canadian Board. They will be making promotional videos, and updating the website. Candice has visited Mercy and Caring Home 3 times, and those who knew her as a young single gal will be interested to meet her husband Trevor. We treasure their commitment to the Lord and MCCH,, and value their experience and wisdom from a younger generation. Please pray for them as well.

[Visit our website around Jan. 16, and check out Candice's updating.](#)
